Web Search

The basics of searching with Google - Dr Google

What Is Requirements ?

- “Precise” vs. “Crisis” - *garbage in garbage out*

* Precise: strictly exact, accurate, and completely free from ambiguity or error.

* Core Characteristics of a Crisis:

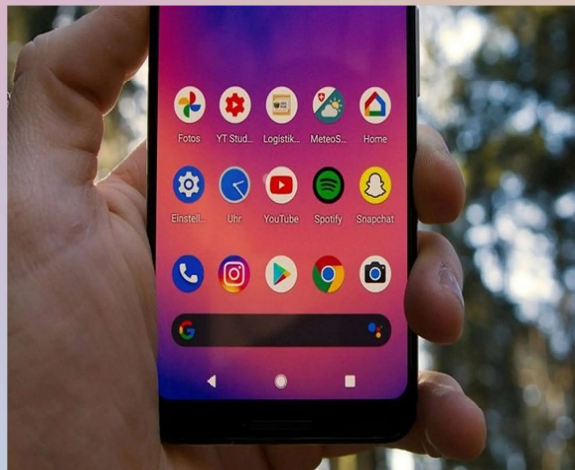

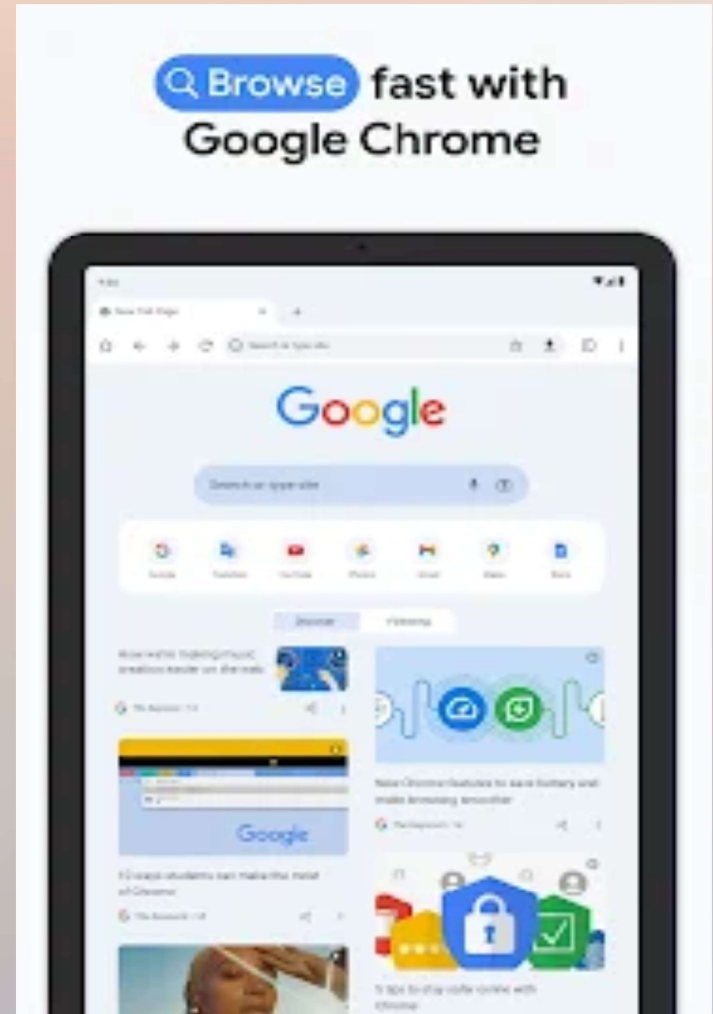

- *Instability*: A sudden *disruption to normal*, everyday functioning.
- *Exhaustion of Resources*: A situation where traditional coping skills or problem-solving methods are *no longer enough to fix the problem*.
- *The Turning Point*: A critical moment that will determine whether the situation *gets significantly better or worse*.

- *Need to know what is really want*

Google Search

- Understanding Google search results
- How to filter Google search result
- How to perform a Google reverse image search: A *reverse image search scans the internet using a picture instead of words. It's a simple but powerful way to find out where an image came from, see where else it's been used, and help you decide whether a photo might be fake.*
- Using Google to search a specific website
- How to exclude results from Google search

Essential Search Techniques

1. Exact Match: Use quotation marks (" ") around a phrase to find that exact phrase in that order.
2. Exclude Words: Put a minus sign (-) directly before a word you want to omit (e.g., apple -fruit).
3. Search Specific Sites: Use site:URL (e.g., site:youtube.com) to restrict results to a specific website.

Essential Search Techniques

4. File Type Search: Use filetype:pdf or filetype:doc to find specific file formats.
5. Boolean Operators: Use AND to include all terms, OR to find either, and NOT to exclude terms.
6. Fill in the Blanks: Use an asterisk (*) as a wildcard to replace unknown words in a phrase.
7. Range of Numbers: Use two periods (..) between numbers to search within a price or date range (e.g., \$50..\$100).

Using the right search engine

- Google Search provides a ranked list of links for factual, real-time, and navigational queries, acting as a library index.
- Hybrid Future: The gap is closing as Google incorporates AI Overviews, which analyze user queries to synthesize information, while AI searches are becoming faster and more accurate in citing sources.
- ChatGPT, Gemini, Copilot

When to Use Which

- Use Google: To find a specific website, up-to-the-minute news, or verify a fact via reputable sources.
- Use AI: To synthesize, analyze, compare multiple options, or learn about a complex topic

- Giao Thông (Transport)

The screenshot shows the Victoria Public Transport website's Journey planner interface. The page has a dark blue header with the Victoria logo and navigation links: Plan a journey, Tickets and myki, Road and active transport, News and resources, and Help and support. A search bar is also present. The main content area features a large blue circle with the text "Start here. Journey anywhere." and a sub-headline "Find all your travel information in one place – public transport, roads, cycling, and walking." To the right, the Journey planner form is displayed, including fields for "From" and "To" (both with placeholder text "Address, station, stop or landmark"), a "Plan my journey" button, and a "Feedback" button on the right side.
